

		Variable Jet Kit VHSH 30 CS (R.9305)										
		No. of turns from fully closed										
Main Jet		1/2	3/4	1	1 ¼	1 ½	1 ¾	2	2 ¼	2 ½	2 ¾	3
200					140	150	160	170	175	180	185	190
220				140	145	155	165	175	185	190		
250		140	150	160	170	180	190					

**Why do you need Jet-Tech RoK when using the variable jet kit?
SAVE YOUR ENGINE!**

The range of the Dellorto main jets when used with the variable jet is dramatic - from the equivalent of a 140 to a 190 main jet! In some instances a 1/4 turn can mean the difference between a main jet equivalent from 170 to 160. So accuracy is critical in ensuring that you not only maintain peak performance of your engine but also to eliminate the risk of seizing your engine.

Only Jet-Tech RoK with this unique and copyright feature can give you the correct settings and parameters to safely configure your carburettor.
